## EVENT DESCRIPTION AND PROBABLE CONSEQUENCES (10)

[2] The cable spreading room cardox system was disabled in AM of 1/8/79 so [3] that cable work in the overhead could proceed. A firewatch was posted at [4] that time. When cable work was completed for the day at about 1:30 PM, [5] the working group supervision failed to notify the shift that they were [6] finished. During the 5½ hours in which the firewatch was not present, [7] the fire detection system was fully operable and numerous people were in [8] and out of the area. Safety significance is minimal.

## CAUSE DESCRIPTION AND CORRECTIVE ACTIONS (27)

[0] Construction supervision failed to notify shift upon completion of day's [1] work. The firewatch left the room upon work completion. The next operat- [2] ing shift, during normal surveillance of area, noticed the error and put [3] the cardox system in service. Construction personnel were instructed on [4] the importance of notifying shift supervision when work is completed.
