SUMMARY

Scope:

This routine, unannounced inspection was conducted in the area of Physical Security Program for Reactors. Specific areas evaluated were: Management Support; Security Program Plans; Protected and Vital Area Barriers; Detection and Assessment Aids; Protected and Vital Area Access Controls - Packages, Personnel and Vehicles; Alarm Stations and Communications; Power Supply; Testing, Maintenance, and Compensatory Measures; and Security Training and Qualifications.

Results:

In the areas inspected, no violations were identified. One non-cited licensee identified violation was found pertaining to personnel access control (paragraph 2a). Two issues pertaining to assessment aids and bullet resistant barriers were discussed with security management personnel (paragraphs 2c and 2d). Otherwise, the licensee continues to provide appropriate security for the vital resources of this facility. Noteworthy was the professionalism of the training, security force and security management.
