July 27, 1992

Mr. A. Bert Davis Regional Administrator Region III U.S. Nuclear Regulatory Commission 799 Roosevelt Road Glen Ellyn, IL 60137

Subject:

Quad Cities Station Units 1 and 2

Secondary Containment Maintenance Procedure

NRC Docket Nos. 50-254 and 50-265

References:

(a) R. Stcls to A. Bert Davis letter dated August 14, 1992

(b) C. Paperiello to Cordeli Reed letter dated August 14, 1992

Dear Mr. Davis:

In Reference (a), Commonwealth Edison documented a request for a Regional Waiver of Compliance from Technical Specification 4.7.C.1.c. Region III management approved this Waiver of Compliance in a teleconference on August 13, 1991. Reference (b) provided formal documentation of the approval.

During the August 13, 1992 teleconference, CECo and Region III management discussed the issue of secondary containment maintenance. As part of the request for a Regional Waiver of Compliance (Reference(a)), CECo committed to develop guidance on an acceptable method of performing secondary containment naintenance during the operating cycle, consistent with the intent of performing secondary containment testing.

CECo has completed the development of this guidance in the form of a station procedure. "Secondary Containment Maintenance Procedure". This has been implemented at Quad Cities Station as a Temporary Procedure, pending approval as a permanent station procedure. This procedure is provided for your information and use (see Attachment). The procedure was implemented in March 1992, and will be initially performed in August 1992.

If there are any guestions or comments on the procedure, please contact John L. Schrage at 708-515-7283.

Sincerely,

John L. Schräge

Nuclear Licensing Administrator
