Updated Final Safety Analysis Report Revision 2
Revised Page Replacement Instructions

Dear Sirs:

On June 30, 1992, we provided one original and ten copies of Revision 2 of the Updated Final Safety Analysis Report (UFSAR) for Limerick Generating Station (LGS), Units 1 and 2. UFSAR Revision 2 was provided on a page replacement basis with a list of effective pages identifying the latest revision date of all current pages. With the list of effective pages, we provided page replacement instructions for incorporating Revision 2 into the NRC copies of the LGS UFSAR. Subsequent to the June 30, 1992 transmittal, we identified several errors in the page replacement instructions, which we wish to correct. The following text pages should not have been listed on the page replacement instructions, since they are not part of Revision 2.
