Gentlemen:

Thank you for your letter of December 27, 1984, in response to our letter and Notice of Violation dated November 27, 1984. As a result of our review, we find that additional information, as discussed with Mr. Levine and members of your staff in a meeting at the ANO site on January 18, 1985, is required. Specifically, the following should be addressed for item A of NRC Report 50-313/84-29; 50-368/84-29:

- The basis for the violation involving installation of cable tray covers was the failure to maintain the plant configuration in accordance with the requirements stated on design drawings. AP&L's response should discuss what measures AP&L intends to take to ensure the plant is maintained as required by design drawings.
- The evaluation performed by AP&L states that the cable tray covers do not fulfill a safety function; therefore, are not required to be installed for plant safety. AP&L should provide information as to what action will be taken to revise baseline design documents to reflect the results of the tray cover evaluation.

Please provide the supplemental information with 30 days of the date of this letter.

Sincerely,

"Original Signed By:  
D. R. HUNTER"

D. R. Hunter, Chief
