

February 27, 1985

DCR 016

Docket Nos. 50-317  
and 50-318

Mr. A. E. Lundvall, Jr.  
Vice President - Supply  
Baltimore Gas & Electric Company  
P. O. Box 1475  
Baltimore, Maryland 21203

Dear Mr. Lundvall:

On February 14, 1985, the Commission issued Amendment Nos. 98 and 80 to Facility Operating License Nos. DPR-53 and DPR-69 for Calvert Cliffs Nuclear Power Plant, Unit Nos. 1 and 2, in response to your application dated October 11, 1984. The amendments revised the Technical Specifications to allow completion of the third containment Integrated Leak Rate Test prior to the 10-year Inservice Inspection outage, allowing for a "one time only" schedule change for the third test.

The amendments contained an error in that the changed Technical Specification page 3/4 6-2 for Unit 1 was not transmitted with the amendment, though the unchanged backup page was included. The Unit 2 Technical Specification page 3/4 6-2 was transmitted, but without the backup page (3/4 6-1).

Enclosed are corrected pages 3/4 6-2 for both the Unit 1 and Unit 2 Technical Specifications. Please accept our apologies for any inconvenience this clerical error may have caused you.

Sincerely,

David H. Jaffe, Project Manager  
Operating Reactors Branch No. 3  
Division of Licensing

Enclosures:

- Page 3/4 6-2 to Amendment 98
- Page 3/4 6-2 to Amendment 80
