Gentlemen:

VOGTLE ELECTRIC GENERATING PLANT
DETAILED CONTROL ROOM DESIGN REVIEW

In our letter ELV-02506 dated March 12, 1992, Georgia Power Company indicated that the remaining detailed control room design review (DCRDR) items for Vogtle Electric Generating Plant (VEGP) - Unit 2 would be completed by the end of the second refueling outage. This letter confirms that the instrument striping, which was the only remaining item, has been completed.

If there are any questions, please contact this office.

Sincerely,

C. K. McCoy
