Mr. James R. Miller, Chief
U. S. Nuclear Regulatory Commission
Office of Nuclear Reactor Regulation
Division of Licensing
Washington, DC 20555

References: (1) Letter from R. L. Andrews to Mr. James R. Miller,
dated August 13, 1984 (LIC-84-269).

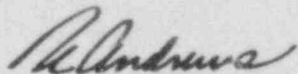

(2) Docket No. 50-285

Dear Mr. Miller:

Toxic Gas Monitoring (TGM) Instrumentation

The Omaha Public Power District's letter to the Commission dated August 13, 1984 (Reference 1) informed your office that the District's TGM system would be declared operable by September 30, 1984. This letter serves to provide formal notification that the District declared the TGM system operable on September 28, 1984. We notified your office (Mr. E. G. Tourigny, NRC Project Manager for Fort Calhoun Station) of the operability of the system in a telephone call on October 1, 1984. Preparation of Technical Specifications for the Toxic Gas Monitors is currently underway. It is expected that submittal will be made by the end of January, 1985.

Sincerely,

R. L. Andrews
Division Manager
Nuclear Production
