

UNITED STATES
NUCLEAR REGULATORY COMMISSION
WASHINGTON, D.C. 20565

July 16, 1992

MEMORANDUM FOR: John W. Craig, Project Director
License Renewal Project Directorate
Associate Directorate for Advanced Reactors
and License Renewal
Office of Nuclear Reactor Regulation

FROM: Barry Zalzman, Senior Project Manager
License Renewal Project Directorate
Associate Directorate for Advanced Reactors
and License Renewal
Office of Nuclear Reactor Regulation

SUBJECT: ASSISTANT DIRECTOR FOR ENVIRONMENTAL PROJECTS (ADEP) PROJECT
INSTRUCTIONS

Starting in 1972, the ADEP in the Atomic Energy Commission's Directorate for Licensing issued Project Instructions (PIs) to environmental projects personnel on a variety of issues. ADEP PIs predated the project manager's handbook, standard review plans (SRPs), and Environmental SRPs (ESRPs). Although there is overlap between ADEP PIs and the current staff guidance, it is not apparent that ADEP PIs were replaced by more recent guidance nor withdrawn. With the dissolution of the environmental projects staff in 1980, this set of instructions fell into a state of disrepair. In spite of the fact that a number of ADEP PIs serve as references in review documents (for example, ESRP sections), they were never archived.

Over the last 6 months, we were successful in locating a number of partial sets of the ADEP PIs and have attempted to reconstruct a complete set for the record. While we will continue the search for the few outstanding PIs, it is useful to make the set available at this time for staff and public use. The listing (that includes a number of voided or superseded PIs) and the set of PIs that could be retrieved at this time are enclosed. As we begin to develop

guidance documents for the siting and environmental protection areas, notably the ESRP and guidance for project managers, and as we review the agreements with other Federal agencies, we should make judgments on the disposition of each ADEP PI.
