ATTN: Shearon Harris Limited Appearance

50-400 OL

Dear Sir:

It is with pleasure that I submit this letter of support for the licensing of the Shearon Harris Nuclear Plant.

In my position as Town Manager of the Town of Zebulon, I can assure you that it is imperative that this plant come on line as soon as possible. Wake County and the surrounding area is growing at a very rapid pace. Good planning for the future dictates that we must have an adequate power supply in order to attract industry to provide jobs for the thousands of people relocating to our area

I am also in a position to assure you that the general feeling about Carolina Power and Light Company in this area is one of satisfaction with the services provided. We are confident that they have the expertise and are most competent to operate this proposed plant safely and economically.

I conclude by requesting that you expedite the approval process and express my appreciation for you allowing me to comment on this issue.

Sincerely,

Donald E. Horton  
Town Manager
