Mr. James R. Miller, Chief
U. S. Nuclear Regulatory Commission
Office of Nuclear Reactor Regulation
Division of Licensing
Washington, DC 20555

- References: (1) Letter from R. L. Andrews to J. R. Miller,
dated September 20, 1984 (LIC-84-308)
- (2) Docket No. 50-285

Dear Mr. Miller:

Process Control Program (PCP)

The Omaha Public Power District's letter to the Commission dated September 20, 1984 provided a revised schedule for submittal of Technical Specifications (RETS) and the Offsite Dose Calculation Manual (ODCM) relative to the Radiological Effluent Technical Specification issue for Fort Calhoun. Included in the revised schedule was the date the PCP would be available at Fort Calhoun.

The RETS and ODCM were submitted for Commission review with the District's letter dated October 18, 1984. However, the PCP is not available at Fort Calhoun as discussed with Mr. E. G. Tourigny of your staff.

During performance of the background work necessary for development of a PCP, it became evident that it is a task of much larger magnitude than originally anticipated. To date, background work and extensive testing has been completed. However, further testing and analysis are required, and current plans indicate completion by January 15, 1985. Therefore, the formal PCP will be available at Fort Calhoun after January 15, 1985.

Sincerely,

R. L. Andrews
Division Manager
