MEMORANDUM FOR: Harold R. Denton, Director
Office of Nuclear Reactor Regulation

FROM: John B. Martin, Regional Administrator

SUBJECT: PALO VERDE NUCLEAR GENERATING STATION UNIT 1
OPERATIONAL READINESS REPORT (MC 94300)

This letter transmits the first Region V report summarizing the readiness of Palo Verde Unit 1 for issuance of a Low Power Operating License. At present, the number of items which require resolution by the licensee and review by the Region V staff is too large to permit a recommendation that a license be issued.

It is anticipated that in approximately two weeks, sufficient work will have been accomplished by the licensee and reviewed by the staff to significantly reduce the number of outstanding items. At that time, if warranted, a recommendation and updated evaluation will be provided.
