OFFICE OF ENFORCEMENT
NOTIFICATION OF SIGNIFICANT ENFORCEMENT ACTION

Licensee: Baltimore Gas and Electric Company   (EA 92-095)
(Calvert Cliffs Units 1 and 2)
Docket Nos. 50-317 and 50-318

Subject: PROPOSED IMPOSITION OF CIVIL PENALTY - $50,000

This is to inform the Commission that a Notice of Violation and Proposed Imposition of Civil Penalty in the amount of $50,000 will be issued on or about August 7, 1992 to Baltimore Gas & Electric Company. This action is based on two violations stemming from the discovery of the potential for the emergency diesel generators to load in a manner not previously analyzed during certain loss of coolant accidents coincident with a loss of offsite power. After this problem was initially identified by the licensee in 1987, it was neither corrected nor reported to the NRC as required. Collectively, these violations have been classified as a Severity Level III problem. After considering the escalation and mitigation factors of the Enforcement Policy, no adjustment to the base civil penalty was made.

It should be noted that the licensee has not been specifically informed of the enforcement action. The schedule of issuance and notification is:

Mailing of Notice   August 7, 199?
Telephone Notification of Licensee   August 7, 1992

The State of Maryland will be notified.

The licensee has thirty day s from the date of the Notice in which to respond. Following NRC evaluation of the response, the civil penalty may be remitted, mitigated, or imposed by Order.
