and Generic Requirements

Harold R. Denton, Director
Office of Nuclear Reactor Regulation

Richard C. DeYoung, Director
Office of Inspection and Enforcement

Tim Martin, Director
Division of Engineering and Technical Programs

Richard Weller
Leader of Safety and Environmental Review Section
TMI Program Office

FROM: William J. Dircks
Executive Director for Operations

SUBJECT: DOCUMENT REQUEST FROM CONGRESSMEN UDALL AND MARKEY

A recent letter from Congressmen Udall and Markey contained the following request:

"[P]lease provide all notes, memoranda and other documents including but not limited to those between Commission offices and Commission assistants and Commissioners, indicating the timing and substance of communications between the staff and the Commission on the leak rate falsification matter."

As you may recall, a prior search for documents related to the Hartman matter was conducted this past June in response to a motion by an intervenor in the restart proceeding, and documents responsive to that request were identified at that time. That request was broader than the Udall/Markey request, and should have identified all responsive documents up to that date. However, a recent review of OIA's files has uncovered two additional staff-originated responsive documents prior to that date which had not been previously identified. For that reason, I am enclosing a list of all staff-originated documents we have identified to date as responsive to the Udall/Markey request; please review that list and identify any additional staff-originated documents which you believe may be responsive.

If you have any questions concerning this request, please contact Mary Wagner in ELD (x28659). Any additional documents identified should be discussed with her, for coordination of our response.

Handwritten signature of William J. Dircks in cursive.
