MEMORANDUM FOR: Harold R. Denton, Director, Office of Nuclear Reactor Regulation

FROM: Thomas E. Murley, Regional Administrator, RI

SUBJECT: REPORT OF INQUIRY ON POSSIBLE FALSIFICATION OF REACTOR OPERATOR TRAINING RECORDS

Enclosed for your information is a Report of Inquiry received by Region I from the Office of Investigation (OI) concerning an intra-company memorandum provided to OI from Robert Arnold, President, General Public Utilities Nuclear (GPUN), on June 2, 1983. This memorandum could be construed to indicate falsification of reactor operator training records; however, upon inquiry, OI found no evidence of false training records.

This information is being provided to you at this time because you may deem it relevant and material to an issue in the restart proceeding and accordingly you may wish to notify the appropriate boards. Please note that the Report of Inquiry indicates it should not at this time be distributed outside the NRC, and consequently, you should check with OI prior to such distribution. Should you require further information in this regard, please advise.
