Attention: Ms. E. Adensam, Chief
Licensing Branch No. 4
Division of Licensing
U.S. Nuclear Regulatory Commission
Washington, D.C. 20555

Dear Ms. Adensam:

In the Matter of) Docket Nos. 50-327
Tennessee Valley Authority) 50-328

By the November 23, 1982 letter to you from L. M. Mills, TVA requested NRC to approve the use of a short duration integrated leak rate test (Type A) at our Sequoyah Nuclear Plant, units 1 and 2. The short duration test was to be performed in accordance with the Bechtel Topical Report BN-TOP-1, Revision, dated November 1, 1972. NRC subsequently issued approval of the use of the short duration test since the report had been previously approved and accepted by the NRC for use at other facilities. However, the January 7, 1983 letter from T. M. Novak to H. G. Parris, which provided NRC approval, only addressed unit 1. Therefore, this letter is to provide notification that as stated in the November 23, 1982 letter, we plan to utilize the short duration test also on unit 2 at Sequoyah.

If you have any questions concerning this matter, please get in touch with Jerry Wills at FTS 858-2683.

Very truly yours,

TENNESSEE VALLEY AUTHORITY

J. A. Domer
