Gentlemen:

SUBJECT: NRC INSPECTION REPORT NOS. 50-445/92-23; 50-446/92-23 (NOTICE OF VIOLATION)

This refers to the inspection conducted by Mr. W. M. McNeill of this office on June 22-25, 1992. The inspection included a review of activities authorized for your Comanche Peak Steam Electric Station, Units 1 and 2. At the conclusion of the inspection, the findings were discussed with you and those members of your staff identified in the enclosed report.

Areas examined during the inspection are identified in the report and included quality assurance administration and control of measuring and test equipment. Within these areas, the inspection consisted of selective examination of procedures and representative records, interviews with personnel, and observations by the inspector. The inspection findings are documented in the enclosed report.

Based on the results of this inspection, certain of your activities appeared to be in violation of NRC requirements, as specified in the enclosed Notice of Violation (Notice). This violation represents a failure to provide traceability and administrative controls over vendor supplied test equipment. Although this violation is classified at Severity Level V, you are requested to respond since the concern was identified by the NRC inspector and corrective actions were not in place at the end of this inspection.

You are required to respond to this letter and should follow the instructions specified in the enclosed Notice when preparing your response. In your response, you should document the specific actions taken and any additional actions you plan to prevent recurrence. After reviewing your response to the Notice, including your proposed corrective actions and the results of future inspections the NRC will determine whether further NRC enforcement action is necessary to ensure compliance with NRC regulatory requirements.

In accordance with 10 CFR Part 2.790 of the NRC's "Rules of Practice," a copy of this letter and its enclosures will be placed in the NRC Public Document Room.

The response directed by this letter and the enclosed Notice are not subject to the clearance procedures of the Office of Management and Budget as required by the Paperwork Reduction Act of 1980, Pub. L. No. 96.511.

Should you have any questions concerning this inspection, we will be pleased to discuss them with you.

Sincerely,

A. Bill Beach, Director  
Division of Reactor Projects
