Perry Nuclear Power Plant
Docket Nos. 50-440; 50-441
SER Confirmatory Issue No. 7
Generic BWR Safety/Relief Valve
Operability Test Results

Dear Mr. Youngblood:

Your letter of October 22, 1984 forwarded questions on the applicability of generic safety/relief valve test results to the Perry Nuclear Power Plant as reported in GE Technical Report NEDE-24988-P.

An earlier letter to you on the same subject, dated March 11, 1983, addresses these questions. We believe that this information should resolve Confirmatory Issue No. 7 in the next Supplement to the Safety Evaluation Report.

If you have any questions, please contact me.

Very truly yours,

Murray R. Edelman
Vice President
