Dear Mr. Stewart:

SUBJECT: NORTH ANNA POWER STATION, UNITS 1 AND 2 - STATION BLACKOUT RULE
(10 CFR 50.63) (TAC NOS. M68572 AND M68573)

By letter dated June 8, 1992, we provided you our Supplemental Safety Evaluation (SSE) approving your February 10 and March 17, 1992 submittals for compliance with the Station Blackout Rule (10 CFR 50.63). Since Generic Issue B-56, "Emergency Diesel Generator Reliability" has not yet been resolved, our SSE required that you commit to an emergency diesel generator (EDG) reliability program that contains, as a minimum, the five elements of Section 1.2 of Regulatory Guide 1.155, "Station Blackout." In your letter dated August 4, 1992, you stated that your current EDG reliability program contains the required five elements, and you committed to maintain these elements until such time that resolution of B-56 is obtained. Further, upon resolution of B-56, you will then assess your present reliability program for continued compliance with B-56.

Your commitment, as noted above, adequately addresses the staff concern as stated in our SSE dated June 8, 1992. Therefore, we find NA-1&2 to be in compliance with 10 CFR 50.63, and we are closing TAC Nos. M68572 and M68573.

Finally, we request that you notify us when final implementation of 10 CFR 50.63 is complete at NA-1&2.

Sincerely,

Original signed by:
Leon B. Engle, Project Manager
