Dear Mr. Smith:

SUBJECT: COMBINED INSPECTION REPORT NOS. 50-352/92-17 AND 50-353/92-17

This letter transmits the results of the resident safety inspection by Messrs. T. Kenny and L. Scholl, from June 7 - July 18, 1992, at the Limerick Generating Station, Limerick, Pennsylvania. The inspection focused on the observation of activities important to ensuring the public health and safety. Reviews of documents and interviews of plant personnel were also performed. The results have been discussed with Mr. J. Muntz of your staff.

The Inspectors noted prompt and thorough corrective actions taken, by your staff, regarding: The 10 CFR 21 Report concerning loose end caps on Rosemont Transmitters; Bulletin 92-01, Thermo-Lag Fire Protection Discrepancies; and NRC Information notice 92-30, Falsification of Plant Records. Also, an inspection of your plant startup following refueling showed the startup program was very well performed by your staff.

No violations were identified by the NRC during this inspection.

We appreciate your cooperation.

Sincerely,
