Docket Nos. 50-352
50-353

Philadelphia Electric Company
ATTN: Mr. Shields L. Daltroff
Vice President
Electric Production
2301 Market Street
Philadelphia, PA 19101

Gentlemen:

Subject: Combined Inspection 50-352/85-02; 50-353/85-01

This refers to the routine resident safety inspection by Mr. J. T. Wiggins on January 1 - 31, 1985 at the Limerick Generating Station, Limerick, Pennsylvania. The inspection consisted of document reviews, interviews, and observation of activities, and the results have been discussed with Messrs. G. M. Leitch and J. M. Corcoran of your staff.

Apparent violations of NRC requirements are cited in Appendix A and categorized under the NRC Enforcement Policy, 10 CFR 2 Appendix C (49 FR 8583) March 8, 1984. A reply is required and should be prepared in accordance with Appendix A.

As indicated in Section 3 of the enclosed report, several instances were identified during the inspection period in which the operability status of certain equipment and systems described in Technical Specifications was not adequately controlled. As a result, operations were being conducted with these systems or equipment in a degraded mode without operations personnel cognizant of the conditions. Additionally, in one instance, the control room heating, ventilation and air conditioning system was operated in a condition that was not bounded by the accident analyses for airborne radiation, chlorine or toxic gas releases. We believe management attention should be focused upon actions to improve performance in this regard. Therefore, we will review the corrective actions stated in your response to Appendix A to verify that they adequately address our concerns.

Your reply to Appendix A is exempt from the Office of Management and Budget's clearance procedures under the Paperwork Reduction Act of 1980, PL 96-511.

Your cooperation is appreciated.

Sincerely,

Original Signed By:
