Gentlemen:

SUBJECT: NRC INSPECTION REPORT NO. 50-382/92-16

This refers to the inspection conducted by Mr. M. F. Runyan of this office on July 20-22, 1992. The inspection included a review of activities authorized for your Waterford Steam Electric Station, Unit 3, facility. At the conclusion of the inspection, the findings were discussed with Mr. D. F. Parker and other members of your staff identified in the enclosed report.

The area of measuring and test equipment was examined during the inspection. Within this area, the inspection consisted of selective examination of procedures and representative records, interviews with personnel, and observations by the inspector. The inspection findings are documented in the enclosed inspection report.

Within the scope of the inspection, no violations or deviations were identified.

We also examined actions you had taken with regard to previously identified inspection findings. The status of these items is identified in paragraph 2 of the enclosed report. Regarding Violation 382/9201-01, members of your staff stated during the exit meeting that a supplemental letter would be sent to us updating the status of corrective actions.

In accordance with 10 CFR 2.790 of the NRC's "Rules of Practice," a copy of this letter and its enclosure will be placed in the NRC Public Document Room. Should you have any questions concerning this inspection, we will be pleased to discuss them with you.

Sincerely,

A. Bill Beach, Director  
Division of Reactor Projects
