Dear Sir/Madam

OFFICE OF SECRETARY  
DUCKETT & CIVIL  
BRANCH

5

I am opposed to nuclear energy because I believe its long-term consequences to be disastrous. Further, its use inhibits research, development & use of cleaner sources of energy, and does not encourage people to develop better habits (ie conserve energy).

I am vehemently opposed to plans for dry cask high-level nuclear waste storage at Palisades, which I understand is being contemplated. I also understand there has been no public hearing, no proper cost/benefit analysis, no environmental impact study, no proper test of VSC-24, no proper monitoring & there is no proper evacuation plan.

I ask for responsible government which looks out for the needs & desires of its citizens.  
NO NUKES IS GOOD NUKES.

Very Truly Yours,

Amy L. Young
