Re: Docket No. 50-27

Gentlemen:

In response to your letter of July 17, 1992 and its accompanying draft version of the Washington State University modified TRIGA Reactor Technical Specifications, we hereby certify that the set of technical specifications received from you appropriately reflect the requirements of our facility.

You may like to correct the very minor typographical error on page 18 under Specifications: (1); the word "preci-pitate" should be changed to "precipitate". The hyphen doesn't belong.

We are happy with the current version of the technical specifications. We are uncertain as to how we should respond to your suggestion that "the change to licensed power level will be dealt with under separate amendment..."

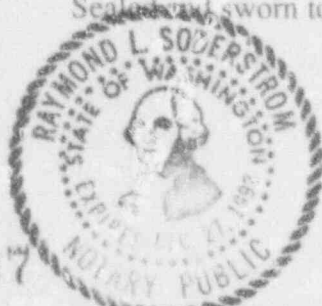

Sincerely,

Gerald E. Tripart
Director
