Re: Licensed Well Logging Operations

Gentlemen:

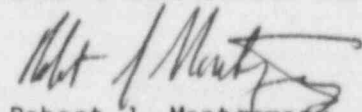

We would appreciate receiving a listing of the organizations which hold an NRC license for the use of radioactive materials in well-logging operations. Per our recent telephone conversation with Ms. B. J. Holt, we understand that a listing of such firms is available, upon written request. We would appreciate receiving this listing for firms which are licensed to operate in NRC Region 3, including the states of Wisconsin, Minnesota, Michigan, Ohio, Indiana, Illinois and Iowa.

In addition, we would like to register our displeasure with the present licensing regulations, which effectively prevent any new firms from entering the well-logging field except by hiring personnel from already licensed organizations. We understand your concern with recent contamination incidents. However, we question whether restricting this field to those organizations already involved in it is the best way to prevent future problems. Any information which you may be able to provide on possible future revisions to the licensing procedure would be appreciated.

Thank you for your cooperation in providing the listing of licensed well-logging organizations.

Sincerely,

WARZYN ENGINEERING INC.

Robert J. Montgomery, P.E.  
Project Engineer
