ATTN: Mr. J. L. Leonard  
Vice-President - Nuclear  
P. O. Box 618  
Shoreham Nuclear Power Station  
Wading River, New York 11792

Gentlemen:

Subject: Inspection No. 50-322/84-39 (October 1 - October 31, 1984)

This routine inspection of the Shoreham Nuclear Power Station included review of previously identified inspection findings, emergency diesel generator testing, storage of safety-related equipment, service water system corrosion problems, low pressure coolant injection system motor generator set field inspection, scram pilot solenoid valve materials, and administration of security guard examinations.

This inspection report identified two unresolved items which must be resolved prior to operation requiring emergency diesel generators (84-39-01) and (84-39-02). No violations of NRC requirements were found, and you need not reply to this letter.

Your cooperation with us is appreciated.

Sincerely,

Original Signed By:
