Gentlemen:

SUBJECT: EXAMINATION REPORT NO. 50-368/OL 92-02

During the week of August 3, 1992, NRC administered examinations to 12 employees of your company who had applied for licenses to operate your Arkansas Nuclear One Unit 2 (ANO 2) facility. All applicants passed all parts of these examinations and have been issued the appropriate license.

Applicant performance in the examinations was generally very good. No generic weaknesses were observed during the examinations. Strengths were noted in senior reactor operator applicant oversight of system controls operation and in applicants' communication discipline to insist on acknowledgements from the intended recipient.

An apparent failure to follow procedures regarding temporary modifications was brought to the attention of the operations staff and referred to the senior resident inspector for follow-up. However, no response is required in connection with this report.

In accordance with 10 CFR Part 2.790 of the Commission's regulations, a copy of this letter will be placed in the NRC Public Document Room.

Should you have any questions concerning this letter, please contact us.

Sincerely,

A. Bill Beach, Director
Division of Reactor Projects
