Docket No. 50-438
License No. CPPR-122

The following violation was identified during an inspection conducted on December 1-31, 1984. The Severity Level was assigned in accordance with the NRC Enforcement Policy (10 CFR Part 2, Appendix C).

10 CFR 50, Appendix B, Criterion V, and the accepted QA Program (TVA-TR-75-1A, Rev. 8) Section 17.1.A.5 requires in part that activities affecting quality shall be prescribed by documented procedures of a type appropriate to the circumstances and shall be accomplished in accordance with these procedures. Paragraph 6.1.6 of Bellefonte QCP-10.30 Rev. 5 states in part that craft foremen/dual rated are to be trained and qualified to appropriate Construction Training Modules prior to being assigned to a new work activity.

Contrary to the above, as of December 11, 1984, activities affecting quality were not being accomplished in accordance with documented procedures in that an instrumentation craft foreman/dual rated was not trained and qualified to appropriate Construction Training Modules prior to being assigned to a new work activity.

This is a Severity Level V violation (Supplement II).
