WOLF CREEK NUCLEAR OPERATING CORPORATION

Report for Period Ending June 30, 1992

**Positive Test Results.**

One employee tested positive for marijuana during the period January 1, 1992 through June 30, 1992. This incident was not reportable pursuant to 10 CFR 26.73. The employee's unescorted access was suspended for 15 days during Employee Assistance Program (EAP) referral and evaluation. A joint decision of the EAP, Medical Review Officer (MRO) and Manager Human Resources resulted in reinstatement to duty, conditioned upon the employee's commitment to discontinue abusive use of substances, continue counseling as directed by the EAP and submit to examinations by company medical/psychological personnel upon request. The employee tested negative for all substances under direct observation prior to reinstatement.

One contractor tested positive for marijuana on a pre-access screen and was denied access. One contractor tested positive for alcohol on a random screen and that individual's access was removed.

In addition, one WCNOC employee tested positive for cocaine as the result of a directed screen and her employment was terminated. WCNOC conducts frequent, unannounced "directed" screens upon personnel who had positive drug screens before January of 1990. These tests are not considered "follow-up" tests because the events leading to test preceded implementation of 10 CFR Part 26.

WCNOC had no "for-cause" screens during the reporting period.

**Initiatives Taken.**

N/A

**Summary of events reported under 10 CFR 26.73.**

WCNOC did not have any reportable events under 10 CFR 26.73.
