Gentlemen:

SUBJECT: NRC INSPECTION REPORT 50-382/92-13

This refers to the team inspection conducted by Dr. D. Blair Spitzberg of this office and other accompanying personnel during the period July 27-31, 1992, of activities authorized for your Waterford-3 Generating Station. At the conclusion of the inspection, the findings were discussed with you and other members of your staff identified in the enclosed report.

Areas examined during the inspection included the implementation of your emergency plan and procedures during your annual emergency response exercise. Within these areas, the inspection consisted of selective examination of procedures and representative records, interviews with personnel, and observations by the inspectors. The inspection findings are documented in the enclosed inspection report.

Within the scope of the inspection, no violations or deviations were identified.

Your staff's participation in the emergency exercise demonstrated that your emergency preparedness program and staff were prepared to protect the health and safety of the public. However, the enclosed inspection report identifies one area of weakness in your emergency preparedness program. The weakness involved not including a qualified operator as part of a repair team that was required to manipulate plant equipment.

Exercise weaknesses according to 10 CFR Part 50, Appendix E.IV.F.5, are inspection findings that need to be corrected by the licensee. You are requested to provide this office with a description of your corrective measures and your schedule for completing these actions within 30 days of the date of this letter.

We also examined actions you have taken with regard to previously identified inspection findings. The status of these items is identified in paragraph 2 of the enclosed report.

-2-

In accordance with 10 CFR 2.790 of the NRC's "Rules of Practice," a copy of this letter and its enclosure will be placed in the Public Document Room.

If you have any questions concerning this inspection, we will be pleased to discuss them with you.

Sincerely,

A. Bill Beach, Director,
Division of Reactor Projects
