Docket No. 50-289

Mr. T. Gary Broughton  
Vice President and Director, TMI-1  
GPU Nuclear Corporation  
Three Mile Island Nuclear Station  
P.O. Box 480  
Middletown, Pennsylvania 17057-0191

Dear Mr. Broughton:

SUBJECT: NRC INSPECTION OF TRAINING PROGRAMS AT THE THREE MILE  
ISLAND NUCLEAR POWER STATION (INSPECTION REPORT  
50-289/92-81)

This letter transmits the results of the special training program team inspection led by Mr. David Silk of this office from July 20 to July 24, 1992, at the Three Mile Island facilities in Middletown, Pennsylvania. We found that the training programs at Three Mile Island have been effectively implemented using the Systems Approach to Training (SAT) process. The team's findings were discussed with you and other members of your staff at the conclusion of the inspection on July 24, 1992.

The team inspected the training programs for personnel performing safety-related duties. This inspection was in keeping with NRC policy as stated in the "Commission Policy Statement on Training and Qualification of Nuclear Power Plant Personnel," as published in Federal Register 53 FR 46603, which states that the NRC will expand the method by which it monitors industry training programs by performing training program inspections at selected sites. Areas examined during this inspection are described in the enclosed NRC Region I inspection report. Within these areas the inspection consisted of interviews with training and plant personnel, observation of training activities, and reviews of procedures and records.

In accordance with 10 CFR 2.790 of the Commission's regulation, a copy of this letter and its enclosure will be placed in the NRC Public Document Room.
