Attention: Mr. J. P. O'Reilly, Regional Administrator

Dear Mr. O'Reilly:

SUBJECT: Grand Gulf Nuclear Station
Unit 2

Docket No. 50-417

License No. NPF-29

File: 0260/0512

Reference:

(1) AECM-83/0664, 10-5-83

(2) AECM-83/0822, 1-3-84

(3) AECM-84/0105, 2-17-84

Extensions for Final Responses
for PRD's 83-14, 83-17 and
84-03

AECM-84/2-0020

On November 1, 1984, Mississippi Power & Light Company (MP&L) contacted Mr. R. Carroll, of your office, and requested extensions for submittal of final responses for three deficiencies on Unit 2 identified as potentially reportable under 10CFR50.55(e) by MP&L per References 1, 2 and 3. These potentially reportable deficiencies were identified earlier as PRD's 83-14, 83-17 and 84-03 in References 1, 2 and 3 respectively. The subject deficiencies are all related to Transamerica Delaval, Inc. (TDI) Diesel Generators problems.

MP&L has previously determined that the subject deficiencies are reportable under the provisions of 10CFR21 for Unit 1. Final 10CFR21 reports for Unit 1 were provided in References 1, 2 and 3. MP&L prefers to delay final determination of reportability under 10CFR50.55(e) and corrective action for Unit 2 until we can review and evaluate the TDI Diesel Generator Owners Group recommendations. These recommendations were just recently received by MP&L. Due to the magnitude of these recommendations we do not expect to be able to review and evaluate these until the latter part of December 1984. Taking that into consideration we requested Mr. Carroll to grant an extension to January 26, 1985 for submittal of the subject final reports.

OFFICIAL COPY

Mr. Carroll concurred that this extension was acceptable but requested that we document it in a letter to NRC Region II.

If there are any questions, please advise.

Yours truly,

for
L. F. Dale
Director
