Director of Nuclear Reactor Regulation
ATTN: Mr. James R. Miller, Chief
Operating Reactors Branch #3
Division of Licensing
U. S. Nuclear Regulatory Commission
Washington, DC 20555

SUBJECT: Arkansas Nuclear One - Unit 2
Docket No. 50-368
License No. NPF-6
Proposed Technical Specifications
on Containment Purge Valves,
NUREG 0737 Item II.E.4.2.

Gentlemen:

In a letter dated October 16, 1984 (0CAN108401), AP&L submitted proposed Technical Specifications on the ANO-1 and ANO-2 purge valves. As a result of their review, the staff requested that AP&L revise the wording of the proposed ANO-2 Technical Specification action statement to require the removal of the purge valve handswitch keys. The rewording of the ANO-2 Technical Specification does not affect the previously submitted "Significant Hazards Determination" as it does not change the intent of the submittal. Therefore, as this is a revision to a previously submitted change request no "Significant Hazards Determination" or review fee is included.

Very truly yours,

T. Gene Campbell
