Director of Nuclear Reactor Regulation
United States Nuclear Regulatory Commission
Attn: Mr. Steven A. Varga, Chief
Operating Reactors Branch No. 1
Division of Licensing
Washington, DC 20555

Reference: Beaver Valley Power Station, Unit No. 1
Docket No. 50-334, License No. DPR-66
Proposed Operating License Change Request No. 104, Revision 1

Gentlemen:

Enclosed are:

1. Three (3) originals and thirty-seven (37) copies of a revision to our previous Application for Amendment to our Operating License, dated November 14, 1984, to provide clarification of the minimum Mode 3 reactor coolant loop operating conditions and to specify requirements dependent upon the rod withdrawal capability of the rod control system.
2. Forty (40) copies of documents designated Attachments A and B which set forth the change in Technical Specifications and its safety evaluation.

This is a revision to a previous application for which a license fee was provided, therefore, we have determined that no additional license amendment application fee is required.

Very truly yours,

J. J. Carey
Vice President, Nuclear
