Alabama Power Company
ATTN: Mr. R. P. McDonald
Vice President of Nuclear
Generation
P. O. Box 2641
Birmingham, AL 35291

Gentlemen:

SUBJECT: PERFORMANCE OF DUTIES

On February 27, 1984, four (4) employees of Georgia Power Company were issued senior operator licenses for the Farley Nuclear Plant, Docket Numbers 50-348 and 50-364 (see enclosure). These licenses are subject to the provisions of Title 10 of the Code of Federal Regulations, Chapter 1, Part 55, Section 55.31, with the same force and effect as is fully set therein.

These individuals were examined and licensed by the NRC even though they had less nuclear power plant experience than normally required for applicants at operating facilities. The hot eligibility criteria were waived since each applicant met the cold eligibility criteria for a precritical facility such as Vogtle, had related experience, and completed a performance-based, INPO-accredited training program using a plant-referenced simulator.

The above individuals are fully qualified to perform the duties of senior reactor operators at Farley Nuclear Plant with the exception that they should not be used as Shift Supervisors. If your understanding of this matter is different, please inform this office promptly.

Sincerely,

(Original Signed by DMVerrelli)

David M. Verrelli, Chief
Reactor Projects Branch 1
Division of Reactor Projects
