

NOV 26 1984

Docket No. 50-220

License No. DPR-63

Niagara Mohawk Power Corporation  
ATTN: Mr. B. G. Hooten  
Executive Director  
Nuclear Operations  
c/o Miss Catherine R. Seibert  
300 Erie Boulevard West  
Syracuse, New York 13202

Gentlemen:

Subject: Inspection No. 50-220/84-24

This refers to the routine safety inspection conducted by Mr. J. J. Kottan of this office on October 22-26, 1984, at the Nine Mile Point Nuclear Station, Unit 1, of activities authorized by NRC License No. DPR-63 and to the discussions of our findings held by Mr. Kottan with Mr. J. Aldrich and others of your staff at the conclusion of the inspection.

Areas examined during this chemical and radiochemical measurements program inspection are described in the NRC Region I Inspection Report which is enclosed with this letter. Within these areas, the inspection consisted of selective examinations of procedures and representative records, interviews with personnel, and observations by the inspector.

In addition, our Mobile Laboratory was also brought to your site and used by the inspector to make certain independent measurements. The basic purpose of these independent measurements is to verify your capability for analyzing radioactive effluents, and to achieve and maintain comparable methods of analyses between your facility and the NRC. The complete data from these measurements will be reported in a subsequent Inspection Report.

Our inspector also verified the steps you have taken to correct the violation brought to your attention in the enclosure to our letter dated September 18, 1981. We have no further questions regarding your action at this time.

Within the scope of this inspection, no violations were observed.
