Mr. Darrell G. Eisenhut, Director  
Division of Licensing  
Office of Nuclear Reactor Regulation  
U.S. Nuclear Regulatory Commission  
Washington, D.C. 20555

SUBJECT: Louisiana Power & Light Company  
Waterford SES Unit 3  
Docket No. 50-382  
Amended Request for Extension of Construction Permit

- REFERENCES: 1) Letter from R.S. Leddick to D.G. Eisenhut  
(W3P83-3264), dated September 29, 1983
- 2) Letter from R.S. Leddick to D.G. Eisenhut  
(W3P84-2184), dated August 15, 1984
- 3) Letter from D.G. Eisenhut to J.M. Cain,  
dated June 13, 1984

Dear Mr. Eisenhut:

In the above Reference 1 and pursuant to 10 CFR 50.55(b), Louisiana Power & Light (LP&L) requested that the Commission extend the construction completion date for Waterford SES Unit No. 3 set forth in the Construction Permit, CPPR-103, to September 30, 1984.

In the above Reference 2 LP&L amended Reference 1 by requesting a construction completion extension until December 31, 1984. LP&L hereby submits a second amendment to Reference 1 by requesting a construction completion date extension until February 28, 1985.

LP&L continues to believe that design, construction and testing of Waterford 3 have essentially been completed in accordance with the Final Safety Analysis Report and other licensing documents and that the unit is ready to load fuel. Additional time required to respond to NRC issues (Reference 3) was the basis for the previous extension request. LP&L has since addressed the issue in Reference 3, and the documentation of the NRC staff review to support issuance of an operating license is pending.

Mr. D.G. Eisenhut

Page 2

Completion of the staff efforts and resolution of other outstanding issues are expected to support issuance of an operating license shortly, possibly prior to the expiration date of December 31, 1984. The request for a two month extension is requested to provide sufficient margin beyond the time required to address and close out the outstanding issues to accommodate unanticipated issues or events.

Very truly yours,
