NOTIFICATION OF ORGANIZATIONAL CHANGE

Gentlemen:

In accordance with the requirements of the Environmental Technical Specifications for Plant Hatch, Georgia Power Company hereby provides notification of organizational changes which will require changes to the Technical Specifications. The title of the General Manager Quality Assurance and Radiological Health & Safety has been changed to the Vice President and General Manager Quality Assurance, with a concomittant change in responsibilities. The Manager Nuclear Chemistry and Health Physics has assumed the overall responsibility for the Radiological Environmental Monitoring Program and management oversight of the Health Physics Program. Concurrent with the change in responsibilities of the Vice President Quality Assurance, the Manager Nuclear Chemistry and Health Physics has assumed the oversight responsibility formerly assigned to the Radiological Health and Safety Representative. Radiological Health and Safety reviews have also been incorporated into enhanced site quality assurance programs. Therefore the position of Radiological Health and Safety Representative has been eliminated.

In addition, due to a recent retirement, the position of Vice President and Chief Engineer has been removed from the Engineering and Construction Services Department. A request for an Amendment to the Technical Specifications which reflects the above changes to the Georgia Power Company organization will be submitted in the near future.

If you have any further questions, please contact this office.

Very truly yours,

L. T. Guwra
