Director Nuclear Reactor Regulation
Attention: Mr. B. J. Youngblood, Chief
Licensing Branch No. 1
Division of Licensing
U. S. Nuclear Regulatory Commission
Washington, D.C. 20555

Dear Mr. Youngblood:

- Reference: (1) Fermi 2
NRC Docket 50-341
- (2) Letter, NRC to Detroit Edison, "Fermi 2
Plant Technical Specifications", dated
October 23, 1984

Subject: Fermi 2 Technical Specification Certification

Reference 2 transmitted the final draft of Fermi 2 Technical Specifications and requested their certification.

The final draft has been carefully reviewed. This review identified the need to make certain changes primarily typographical or editorial in nature. These changes have been discussed with the reviewer for BWR Technical Specifications and incorporated in a subsequent draft. One proposed change has been discussed, but cannot be incorporated until an analysis has been submitted justifying the change. This analysis is expected to be submitted by November 30.

Based upon the reviews conducted, I hereby certify that to the best of my knowledge the enclosed draft of the Fermi 2 Technical Specifications accurately reflects the plant, the Final Safety Analysis Report and the staff's Safety Evaluation Reports in all material respects. An affidavit relating to this certification accompanies this letter.
