Docket No. 50-348
Docket No. 50-364

Mr. R. C. Lewis
U. S. Nuclear Regulatory Commission
Region II
101 Marietta Street, N.W.
Suite 3100
Atlanta, GA 30303

**SUBJECT: J. M. Farley Nuclear Plant NRC Inspection of April 25-29, 1983
and May 2-6, 1983**

**RE: Report Numbers 50-348/83-13
50-364/83-11**

Dear Mr. Lewis:

In response to violation B.2 of the subject inspection report, APCo committed to completion of corrective action and "Full Compliance" by August 1, 1984. This date was necessitated by the time required to complete the next training cycle. However, in order to allow for increased training time for the new Emergency Response Procedures and additional simulator retraining shifts to accommodate additional licensed personnel, the simulator retraining schedule has been revised and expanded. The new date for scheduled completion of all corrective action and "Full Compliance" with regard to violation B.2 of the subject inspection report is therefore changed to November 23, 1984.

Yours very truly,

R. P. McDonald
