Nuclear Regulatory Commission

Docket # 50-352

Washington, D.C. 20555

To Whom it may concern:

Philadelphia is 17 miles from Limerick. There have been no evacuation plans presented to the people of this city. How do you evacuate a city of this size and where do you put the people? If a major accident happened that would cause a permanent evacuation of a major city — How do you deal with home and possession losses, as well as means of earning a living. If Philadelphia had to be evacuated, that would also mean job losses for all those people living in the suburbs and working in this city. A major accident at Limerick would devastate the economy of the entire

Northeast portion of the state. Not to mention the emotional devastation that could only be equal to war time disaster.

Nuclear Power Plants, with the highest potential for accidents, should never be built this close to a large metropolitan area. The risk to lives and the economy is too high a chance to take.

Yours truly

Cindy Masiejczyk
