Docket No. 50-461

Document Control Desk  
Nuclear Regulatory Commission  
Washington, D.C. 20555

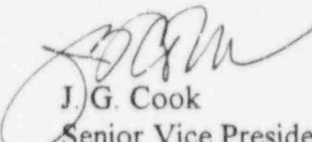

Subject: Illinois Power's (IP's) Notification of Generic  
Letter (GL) 89-10 Design Basis Completion

Dear Sir:

Generic Letter 89-10 contains reporting requirements that each licensee shall notify the NRC in writing within 30 days after completion of design basis reviews, analyses, verifications, tests and inspections that have been instituted to document the design basis for the operation of each motor operated valve (MOV). IP is submitting this letter to attest that IP has completed the baseline activities required to document the design basis for the operation of each GL 89-10 MOV at Clinton Power Station (CPS). These activities are described in the CPS GL 89-10 Program Description and previous correspondence with the NRC. Long term MOV reliability activities are being included in the CPS Maintenance, and Periodic Verification and Trending Programs. Records identifying the actions taken regarding GL 89-10 activities are on file for future review.

Attachment 1 provides an affidavit supporting the facts set forth in this letter.

Sincerely yours,

  
J. G. Cook  
Senior Vice President
