SUBJECT: SURRY UNITS 1 AND 2 - ISSUANCE OF AMENDMENTS RE: SETPOINT LIMITS
(TAC NOS. M92996 AND M92997)

Dear Mr. O'Hanlon:

The Commission has issued the enclosed Amendment No. 206 to Facility Operating License No. DPR-32 and Amendment No. 206 to Facility Operating License No. DPR-37 for the Surry Power Station, Unit Nos. 1 and 2, respectively. The amendments consist of changes to the Technical Specifications (TS) in response to your application transmitted by letter dated July 20, 1995.

These amendments establish a new setpoint for the steam generator high-high level and provide more restrictive setting limits for certain reactor protection system/engineered safety features actuation system setpoints.

A copy of the Safety Evaluation is also enclosed. The Notice of Issuance will be included in the Commission's biweekly Federal Register notice.

This completes our effort on this issue and we are, therefore, closing TAC Nos. M92996 and M92997.

Sincerely,

Original signed by:

Bart C. Buckley, Senior Project Manager
Project Directorate II-1
Division of Reactor Projects - I/II
Office of Nuclear Reactor Regulation

Enclosures:

1. Amendment No. 206 to DPR-32
2. Amendment No. 206 to DPR-37
3. Safety Evaluation
