SUBJECT: EVALUATION OF THE FIRST 10-YEAR INTERVAL INSPECTION REQUESTS FOR RELIEF FOR COMANCHE PEAK STEAM ELECTRIC STATION, UNITS 1 AND 2 (TAC NOS. M93333 AND M93334)

Dear Mr. Terry:

The NRC staff, with technical assistance from its contractor, the Idaho National Engineering Laboratory (INEL), reviewed and evaluated the information provided by Texas Utilities Electric in its letters dated March 6, 1995 (Unit 2), and July 27, 1995 (Unit 1), related to the first 10-year interval inservice inspection program plan requests for relief for the Comanche Peak Steam Electric Station, Units 1 and 2.

The NRC staff's evaluation and conclusions are contained in the enclosed Safety Evaluation (SE). Based on the information submitted, the staff adopts its contractor's conclusions and recommendations as presented in the attachment to the enclosure, the Technical Letter Report. Therefore, relief is granted pursuant to 10 CFR 50.55a(g)(6)(i) for Relief Requests B-6 (Rev. 1) and B-8 for Unit 1, and B-1, B-2, and C-1 for Unit 2. With respect to Relief Request B-7 (Rev. 1), the staff has determined that revised information is not significant, and does not disturb the approval of Relief Request B-7 in an SE, dated February 2, 1995. Thus, the relief remains granted pursuant to 10 CFR 50.55a(g)(6)(i).

The relief granted is authorized by law, will not endanger life, property, or the common defense and security and is otherwise in the public interest, giving due consideration to the burden upon the licensee that could result if the requirements were imposed on the facility.

Sincerely,

ORIGINAL SIGNED BY:

William D. Beckner, Director
