Docket No. 50-341

MEMORANDUM FOR: B. J. Youngblood, Chief
 Licensing Branch No. 1
 Division of Licensing
 Office of Nuclear Reactor Regulation

FROM: B. K. Grimes, Director
 Division of Quality Assurance, Vendor and
 Technical Training Center Programs
 Office of Inspection and Enforcement

SUBJECT: FERMI 2, SER SUPPLEMENT, QUALITY ASSURANCE

Licensee: Detroit Edison
 Plant Name: Enrico Fermi Atomic Power Plant, Unit 2 (Fermi 2)
 Licensing Stage: OL
 Responsible Branch: LB #1
 Project Manager: D. Lynch
 Review Status: SER Supplement complete except for confirmatory action.

We have completed our review and evaluation of the latest operational QA program and Q-List description provided in the Fermi 2 FSAR through Amendment 59. In addition we have also reviewed and evaluated Cygna's final report of the Independent Design Verification Program (IDVP).

The results of these reviews are documented in the enclosed SER supplement. We have noted in the supplement that since our review of the Cygna's IDVP final report is based only on the quality assurance aspects of the report, additional input to the overall NRC's conclusion may be necessary from other technical reviewers. In general we find the IDVP review acceptable with the exception of several minor confirmatory items discussed in the enclosed supplement.

Any questions or concerns in regard to this SER supplement should be reported to John Gilray X27242.
