Inspection Summary

Inspection Conducted January 14-18, 1985 (Report 50-458/85-08)

Areas Inspected: Routine, announced inspection of the Interim Fuel Storage Plan (IFSP), controlled access areas, access controls, intransit protection, material control and accountability of special nuclear material (SNM), and independent inspection effort. The inspection involved 44 inspector-hours onsite by one NRC inspector.

Results: Within the six areas inspected, no violations or deviations were identified.
