FILE *Miller*

Mr. Hubert J. Miller
Regional Administrator
Region III Nuclear Regulatory Commission
801 Warrenville Road
Lisle, Illinois 60532-4351

Dear Mr. Miller:

Enclosed is a copy of the **corrected final report** for the June 20, 1995 plume exposure pathway exercise for the Monticello Nuclear Power Station. A copy was also forwarded to our National Office. The final report that was mailed to you on October 5, 1995 had several corrections that needed to be addressed. Please discard the October 5, 1995 final report and letter.

No Deficiencies were identified during this exercise. There were four Areas Requiring Corrective Action (ARCA), one for the State of Minnesota and three for Sherburne County.

Based on the results of the June 20, 1995 exercise, the offsite radiological emergency response plans and preparedness for the State of Minnesota and Sherburne and Wright Counties, that are site specific to the Monticello Nuclear Power Station, can be implemented. These plans are adequate to provide reasonable assurance that appropriate measures can be taken offsite to protect the health and safety of the public in the event of a radiological emergency at the site. Therefore, the Title 44 CFR, Part 350, approval of the offsite radiological emergency response plans and preparedness for the State of Minnesota, site-specific to the Monticello Nuclear power station as granted on May 10, 1985 will remain in effect.

Please contact Brent C. McMahan at (312) 408-5545 if you have any questions.

Sincerely,

Michelle M. Burkett
