Fort Calhoun Station FC-2-4 Adm.  
P.O. Box 399, Hwy. 75 - North of Fort Calhoun  
Fort Calhoun, Nebraska 68023-0399

SUBJECT: NRC INSPECTION REPORT 50-285/95-22

This refers to the inspection of the radiological environmental and meteorological monitoring programs conducted by Mr. Gilbert L. Guerra, Jr., of this office on November 27 through December 1, 1995, at the Fort Calhoun Station facility. The purpose of the inspection was to determine whether activities authorized by the license were conducted safely and in accordance with NRC requirements. At the conclusion of the inspection, the findings were discussed with those members of your staff identified in the enclosed report.

Areas examined during the inspection are identified in the report. Within these areas, the inspection consisted of selective examinations of procedures and representative records, interviews with personnel, and observation of activities in progress.

Section 4 of the enclosed inspection report includes several inspector observations concerning the implementation of the radiological environmental program. These observations were discussed with your staff as areas where the Fort Calhoun Station program could be enhanced, and are provided to direct your attention to environmental monitoring practices that are more in keeping with industry norms.

In accordance with 10 CFR 2.790 of the NRC's "Rules of Practice," a copy of this letter and its enclosures will be placed in the NRC Public Document Room.

Your cooperation in this matter is appreciated. Should you have any questions concerning this inspection, we will be pleased to discuss them with you.

Sincerely,

  
Thomas P. Gwynn, Director  
Division of Reactor Safety
