Docket No. 50-289

GPU Nuclear Corporation  
ATTN: Mr. H. D. Hukill  
Director, TMI-1  
P. O. Box 480  
Middletown, Pennsylvania 17057

Gentlemen:

Subject: Inspection 50-289/84-38

Between November 16, 1984, and January 7, 1985, Messrs. R. Conte and F. Young conducted a routine safety inspection of activities authorized by NRC License No. DPR-50 at your facility. The inspectors documented the areas examined in the attached NRC Region I Inspection Report. At the conclusion of the inspection, Mr. Conte summarized the inspection findings to you and other members of your staff as noted in the inspection report.

The inspectors also reviewed your December 5, 1984 response to the November 2, 1984 Notice of Violation. Your corrective actions are acceptable with respect to revising the maintenance procedure that established the minor maintenance work. However, you did not address the basic concern regarding this issue in that your independent technical and safety review did not detect and correct this problem during the review process. Accordingly, please provide within 30 days of the date of this letter a supplemental response to address this review inadequacy and your corrective steps taken or planned to avoid further violations of this type.

Within the scope of the inspection, no conditions adverse to nuclear safety or regulatory requirements were identified. Your cooperation with us is appreciated.

Sincerely,

Original Signed By:

Projects Branch No. 1  
Division of Reactor Projects
