Baltimore Gas and Electric Company  
ATTN: Mr. A. E. Lundvall, Jr.  
Vice President, Supply  
P. O. Box 1475  
Baltimore, MD 21203

Gentlemen:

Subject: NRC:RI Inspection 50-317/85-02, 50-318/85-02

This transmits the January 22 - February 19, 1985, resident inspection findings by Messrs. T. Foley and D. Trimble at the Calvert Cliffs Nuclear Power Plant, Lusby, Maryland. Those findings were based on observation of activities, interviews, independent measurements, and document reviews, and have been discussed with Mr. Russell of your staff.

Within the scope of this inspection, no violations were observed.

This report includes observations of licensee performance in response to occurrences involving reactor trip breaker response testing, an engineered safety features actuation circuit modification, a reactor trip caused by an apparent personnel error, and improvement in housekeeping practices. These observations may be used in the future to highlight possible trends in licensee performance as part of the Systematic Assessment of Licensee Performance (SALP) process.

Your cooperation with us is appreciated.

Sincerely,

Original Signed By:

Edward C. Wenzinger, Chief  
Projects Branch No. 3  
Division of Reactor Projects
